Entity Clarity

A practical workbook for making your brand facts clear and consistent, so Google and AI assistants describe you correctly.

Define

One canonical set of brand facts

Align

Every profile and source telling the same story

Check

How AI answers describe you, every quarter

Step 1: Orient

Why brand facts need one version

Before an AI assistant recommends a company, it has to know what the company is. It builds that picture from your site, structured data, Wikipedia, Wikidata, LinkedIn, directories and news. When those sources disagree, the answer drifts.

From the SEO Girl research

In *Who Are You, Really?*, three of five Canadian software brands had two or more founding years in circulation, often traceable to the companies' own storytelling. For two brands, Google's knowledge panel and Google AI Mode gave different answers.

What you'll produce

- A canonical facts sheet, with a definition for every fact that could be read two ways.
- A consistency matrix showing where each fact appears, and where it's wrong or missing.
- Organization schema and a profile fix list.
- A quarterly AI answer check.

Who should do it

One owner (usually marketing or SEO), with sign-off from whoever owns company facts: leadership, communications or legal. Plan on **two to three hours** for the first pass, then about an hour each quarter.

Step	Do this	Save
2	Write your canonical facts.	Facts sheet
3	Audit every place those facts appear.	Consistency matrix
4	Fix your own site and schema first.	Schema and fix list
5	Check what AI assistants say.	AI answer log
6	Keep it current.	Change triggers and rhythm

Step 2: Canonical facts

Write the version you want repeated

Agree on one value for each core fact, and say what it means. "Founded" can mean incorporated, launched or first sale, so pick one and write it down.

Fact	Our canonical value	What it means	Source or proof
Legal name			
Brand name			
Founded (and what that means)			
Founders			
Headquarters			
CEO and key leaders			
What we do, in one sentence			
Size, with a date			
Website			
Key products or services			

Write facts so they survive copying

"Founded in 2008 in Vancouver by Jane Lee and Sam Park" is easy to repeat correctly. "Started in a garage a few years before our first product" isn't.

Step 3: Audit

Find where your facts live

Check each source against your canonical facts. Mark each cell ✔ (matches), ≠ (different) or – (missing).

Source	Founded	Founders	HQ	Leaders	Description	Size
Your About page						
Your schema						
Google knowledge panel						
Wikipedia						
Wikidata						
LinkedIn						
Crunchbase						
Industry directories						
Press kit and news						
ChatGPT answer						
Google AI Mode answer						

Search more than one way

Search your brand name, "[brand] company" and "[brand] Inc". In the research, "[brand] company" sometimes showed a local office listing instead of the company's knowledge panel.

Note where errors come from

When a fact is wrong, find the page it was copied from. Fixing one widely copied source can correct many others over time.

Step 4: Fix at the source

Start with what you control

Your own site comes first: a clear facts section on the About page, and Organization schema that states the same facts and links to your other profiles.

Organization schema template

```
{
  "@context": "https://schema.org",
  "@type": "Organization",
  "name": "[Brand name]",
  "legalName": "[Legal name]",
  "url": "https://[yourdomain]",
  "foundingDate": "[YYYY]",
  "founder": [{"@type": "Person", "name": "[Founder name]"}],
  "address": {"@type": "PostalAddress", "addressLocality": "[City]", "addressCountry": "
[Country]"},
  "sameAs": ["[Wikipedia URL]", "[Wikidata URL]", "[LinkedIn URL]", "[Crunchbase URL]"]
}
```

- [ ] Add a short facts section to the About page, matching your canonical sheet word for word.
- [ ] Add Organization schema with sameAs links to profiles beyond social media.
- [ ] Update LinkedIn, Crunchbase and directories you can edit.
- [ ] Verify your brand with Google and suggest edits to your knowledge panel where needed.
- [ ] For Wikipedia and Wikidata, follow their conflict-of-interest rules: suggest referenced changes rather than editing your own page directly.

Step 5: Check AI answers

Ask what the assistants say

Ask each assistant the same plain question and compare the answer with your canonical facts. Use a temporary or signed-out session where you can, and note the date.

The question to ask

"What is [brand]? When was it founded, who founded it, where is it headquartered, and who is its CEO?"

Tool	Date	What it said	Matches?	Source shown
ChatGPT				
Google AI Mode				
Google AI Overview				
Gemini				
Perplexity				

Read it fairly

Answers change between runs. One wrong answer is a signal to check sources, not proof of a pattern. Repeat the check before acting on it.

AI can be more current

In the research, both AI assistants named a new interim CEO weeks after the change, while the knowledge panel still didn't. News and LinkedIn travel fast; stored records lag.

Step 6: Keep it current

Update everything when something changes

Most inconsistencies start with a change that reached some places and not others.

Change triggers

- [ ] New CEO or leadership change
- [ ] Rebrand or new name
- [ ] Office move or new headquarters
- [ ] Acquisition or merger
- [ ] New founding story or anniversary content
- [ ] New product line that changes what you do

When it happens

- Update the About page and schema the same day.
- Post on your newsroom and LinkedIn.
- Update directories and profiles you control.
- Suggest knowledge panel and Wikidata updates.
- Re-run the AI check after a few weeks.

When	What	Owner
Monthly	Spot-check the knowledge panel and one AI answer	SEO or marketing
Quarterly	Full consistency matrix and AI answer log	SEO or marketing
After any change	Change trigger checklist	Communications, with SEO
Yearly	Review canonical facts with leadership	Marketing lead

Template

Your one-page entity brief

Field	Your notes
Canonical facts approved by	
Facts that needed a definition	
Biggest inconsistency found	
Sources fixed this quarter	
Sources still wrong, and who owns them	
What AI assistants said	
Next change to watch for	
Next review date	

Quality check

- [ ] Every fact has one value and, where needed, a definition.
- [ ] Your About page and schema match the facts sheet exactly.
- [ ] sameAs links point to profiles beyond social media.
- [ ] Knowledge panel edits were suggested where needed.
- [ ] AI answers were checked and dated.

About this workbook

A practical companion to the SEO Girl study *Who Are You, Really?* on brand consistency and the knowledge graph. Check current Google and Wikipedia documentation before making changes. All company names and examples are fictional unless marked as coming from the SEO Girl research series. This workbook isn't affiliated with or endorsed by any company or platform mentioned.
